

Call For Historical Imagery

Google Historical imagery

GOHSEP is looking for any imagery that you may have. We are looking to incorporate as many years as possible in Virtual Louisiana for the Historical Imagery Feature. This feature will allow you to "go back in time" and observe changes to the landscape of our state. This will greatly enhance your experience in Virtual Louisiana.

Google Historical imagery

How Historical Imagery Can Be Utilized:

- observe differences in coastline
- compare pre and post disaster imagery
- monitor the growth and development of cities

The possibilities are endless!
